

FlatPad™

Control Module and Keyless Ignition

For the Equipment Manufacturer

The FlatPad dramatically reduces wiring complexity behind the panel, eliminating many stand-alone switches. Installation is greatly simplified because the FlatPad adheres directly to the panel and there's only one small hole to drill to take the wires. There's a dramatic reduction in electrical wiring harness size, because one small cable connects the Switch Modules. This cable complies to SAE and ABYC standards. We can build a FlatPad to control any circuit you need.

For the Vehicle Operator

With access controlled by a PIN-number, and with keypad activation of the ignition, there's no key to use – and no key to lose!

- **Waterproof**
- **UV-Resistant**
- **Durable, Solid State**
- **Easy to Mount**
- **Ultra-Lightweight Design**
- **Full Custom Wiring Harness Capability**
- **Full Custom Design Available**

The Revolutionary New FlatPad from Cole Hersee Co.

Mounts directly onto the vehicle dashboard, eliminating the need for a whole array of switches and knobs. It can actuate any number of onboard electrical or electronic functions such as the starter motor, wipers, horn or lighting.

Can We Design a FlatPad™ for Your Application?
